

CHRISTOPHER PAZ LEÓN

Flutter Developer | Mobile Product Engineer | Supabase & AI Workflows

[+51 973886687](tel:+51973886687) | contact@christopherpaz.dev | linkedin.com/in/pazleon | christopherpaz.dev

PROFESSIONAL SUMMARY

Mobile Product Engineer focused on Flutter, with experience taking mobile apps from design to production across Google Play, the App Store, and Huawei AppGallery. I connect product, UX/UI, architecture, data, and AI-assisted workflows. My strongest skill is turning complex systems into clear, reliable mobile experiences ready for market.

WORK EXPERIENCE

Founder & Lead Product Engineer

Oct 2025 – Present

[CookPilot](#)

- ✓ Built and launched CookPilot end to end with Flutter, Dart, and Riverpod, leading product, UX/UI, mobile architecture, and cross-platform development.
- ✓ Designed the backend with Supabase, PostgreSQL, Auth, RLS, Edge Functions, RPCs, Storage, and Realtime, modeling complex flows across recipes, menus, days, weeks, shopping, and cooking sessions.
- ✓ Integrated LLM APIs, structured outputs, prompt systems, multimodal processing, and backend validation to turn text, images, and user context into typed actions within the app.
- ✓ Implemented Google Sign-In, Credential Manager, RevenueCat, Huawei IAP, MediaPipe, flavors, and release workflows for Google Play and Huawei AppGallery.

Mobile Software Engineer

Oct 2024 – Oct 2025

4Track / VistoGPS - [4Track S.A.S](#)

Remote

- ✓ Redesigned and developed production GPS applications with Flutter, from Figma to store release, as the sole mobile/frontend owner.
- ✓ Published apps across Google Play, the App Store, and Huawei AppGallery, with public listings showing 1K+ downloads across related production apps.
- ✓ Built real-time GPS tracking flows using WebSockets, map rendering, custom backend authentication and push notifications, biometric authentication, offline synchronization, and local persistence.
- ✓ Worked directly with backend, infrastructure, and management teams to integrate mobile flows with production GPS services and operational requirements.
- ✓ Delivered the mobile design and implementation that remain in production after the engagement.

Technical Product Lead — Contract

JobMatch - [JobMatch S.A.S](#)

May 2025 - Mar 2026

Hybrid - Perú

- ✓ Built the core MVP foundation for an AI-powered recruiting platform serving candidates, companies, and recruiters.
- ✓ Implemented authentication, candidate and company flows, job listings, applications, dashboards, database structure, and backend infrastructure with Supabase. Collaborated closely with the UX/UI designer.
- ✓ Developed AI-assisted matching workflows using structured matching logic, Supabase, PostgreSQL, Row Level Security, and Edge Functions, later used in production.
- ✓ Supported product and technical planning for the ProInnovate / Startup Perú 12G process, contributing to the platform foundation behind 20k USD in funding.

EDUCATION

Software Engineering Studies

Universidad Privada del Norte (UPN)

Perú

ADDITIONAL INFORMATION

Peru • Remote LATAM / US Time Zones • English C1 — comfortable with written asynchronous communication and technical calls • Contractor-ready
